

Mackay State High School, Concrete Works Donation

"TF Woolams And Sons have been a great supporter of our school.

This year alone they have saved the school approximately \$15,000 when Mr Craig Percival kindly offered to concrete a walkway to our hall. This money was then channelled into wireless technology that benefits all of our students.

Woollam's are major contributors to the Mackay Community and to Mackay State High School through philanthropic acts like the concreting, and their many sponsorships of sporting organisations that many of my students are involved in.

I am grateful for their community support and pride."

MJ O'Hanlon

Principal, Mackay State High School

"In my extensive experience of involment with school P & Cs I have never encountered such a singularly magnanimous gesture. Your keen sense of civic responsibility is to be applauded and we can only hope should stand as an example to other industry leaders and the local business community.

The approximately \$20,000 we have saved as a result of your excellent works has placed us six months ahead of our fundraising targets and has given us the opportunity to perform other beautification and enhancement projects throughout our school. For this, our very heartfelt thanks.

It is some months now since you performed this work but be assured the continuing benefits are still experienced daily, and amongst our school community Woollam Constructions is often spoken highly of and remembered kindly."

Janice Quadrio

President, Macaky State High School P & C
